Type of Usage	Done by AI tools	Done by student
Brainstorming and idea generation		
Rephrasing text or formulas or generating text applied directly to the task	We use Gemini to review the script and the text.	
Generating literature/background review	We use Gemini to review the script and the text.	We created the scripts and texts with the help of an LLM.
Coding programming tasks	AI helped us develop solutions to the problems.	We review and correct AI errors, handle hallucinations, and perform end-to-end testing on all generated content, thereby validating the final result.
Producing diagrams/figures		
Analysing data	We use AI to help us understand the data.	We generated the base script for data analysis.
